## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371C of this title before the invention thereof by the applicant for patent.

2. Claim 13 is rejected under 35 U.S.C. 102(e) as being anticipated by *Huttunen et al.*

(5,903,850).

As per claim 13 , *Huttunen et al.* disclose a radio card comprising:

- a radio (fig. 7/no. 1,31);
- a detachable connector (fig. 7/no. 3); and
- a first lead (fig. 7/no. 6) for carrying an RF signal (fig. 2/no. 9, fig. 4/no. 39) from said radio to said detachable connector and from said detachable connector to said radio and for carrying a first baseband signal (fig. 2/no. 10) indicative of when said radio is operating.

### ***Claim Rejections - 35 USC § 103***

Art Unit: 2684

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-12 and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Huttunen et al.* (5,903,850) in view of *Wells* (4,935,746).

As per claims 1-2, 6-7, 11, and 14-15, *Huttunen et al.* disclose a wireless terminal comprising:

- an antenna (fig. 7/no. 2,32);
- a radio (fig. 7/no. 1,31);
- a signal lead (fig. 2/no. 6,8, fig. 4/no. 6,38) for carrying an RF signal (fig. 2/no. 9, fig.

4/no. 39) from said radio to said antenna and from said antenna to said radio and for carrying a first baseband signal (fig. 2/no. 10) from said radio to said first visual indicator for activating said first visual indicator (fig. 1/no. 35,60,61a,61b,61c, abstract, col. 2/ln. 66-col. 5/ln. 39).

*Huttunen et al.* disclose Applicant's invention except teaching a first visual indicator that indicates to a user of said wireless terminal when a radio is transmitting/receiving. *Wells* disclose indicator that indicates to a user of said terminal when a radio is transmitting/receiving (fig. 1/no. 102, fig. 2/no. 28, fig. 3/no. 46,58, col. 2/ln. 12-col. 3/ln. 58). In order for the user to easily determine the status of the call at any given time, it would have obvious to one of ordinary skill in

Art Unit: 2684

the art at the time of Applicant's invention to provide an efficiency monitoring antenna as taught by *Wells* in conjunction with a mobile radio communication device as taught by *Huttunen et al.*.

As per claim 4 and 9, *Huttunen et al.* further disclose wherein said signal lead is connected to said radio by a detachable connector (fig. 2/ no. 3).

As per claim 5, 10, 12, 16-17, *Wells* further disclose a second visual indicator that indicates when said radio is receiving/transmitting (fig. 1/no. 102, fig. 2/no. 28, fig. 3/no. 46,58, col. 2/ln. 12-col. 3/ln. 58) and wherein said signal lead also carries a second baseband signal (see *Huttunen et al.* , fig. 2/no. 10, col. 2/ln. 66-col. 5/ln. 39) from said radio to said second visual indicator.

5. Claims 3 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Huttunen et al.* (5,903,850) in view of *Wells* (4,935,746) and further in view of *Stein* (5,628,055).

As per claim 3 and 8, *Huttunen et al.* in view of *Wells* disclose Applicant's invention except teaching said radio is integral to a PC radio card. *Stein* disclose said radio is integral to a PC radio card (fig. 10/no. 131). In order to enable PC readily radio communicate with other networks, it would have obvious to one of ordinary skill in the art at the time of Applicant's invention to provide a modular radio communications system as taught by *Stein* in conjunction with a mobile radio communication device as taught by *Huttunen et al.* in view of *Wells*.

### **Conclusion**

Art Unit: 2684

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

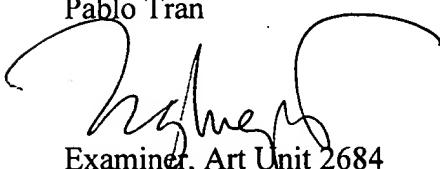

Braitberg et al. (5,479,479), Garner et al. (4,792,986) disclose method and apparatus for wireless communications system.

7. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Pablo Tran whose telephone number is (703)308-7941. The fax number for this Group is (703)308-6306 and (703)308-6296.

Any inquiry of a general nature to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703)305-4700.
